	Historic 5-Globe Ornamental Light (14')
	LED Mid-Level Street Light (30')
	Traffic Signal with LED Street Light (30')
	Waste Receptacle

It should be noted that in the event the recommended five-globe light fixture is not feasible to include in this project (for practical reasons or unmitigable), the previously considered acorn light fixture is an acceptable alternative; a modern visually inconspicuous alternative would also be acceptable. In addition, if further consideration of trees persists – it should be considered to include them along the park block face to incorporate them into that setting. This would minimize their effect on the businesses that were not in favor and minimize their impact on the historic integrity of downtown.

The following streetscape elements should continue to be reviewed and discussed amongst City and MnDOT staff to determine which elements, if any, are incorporated in the final design.

1. Banners / Flags
2. Wayfinding Signs
3. Benches
4. Hanging Baskets
