- Open house will be held in the winter of 2019 for the public to view the bridge's final design
- Construction in 2019

Contractor

- TBD – bridge project will go out for bid in March of 2019

Adverse Effect

Loss of the existing bridge has been determined as an “Adverse Effect” to the Lac qui Parle Flood Control Project Historic District, which is eligible for listing in the National Register of Historic Places. As the new bridge progresses, MnDOT is consulting with the State Historic Preservation Office and other interested parties on ways to avoid and reduce further effects to historic resources.

To comment on the project and its effects to historic resources please contact MnDOT Project Manager, Gene East by September 30, 2018.
