

Highway 316 Improvements Project

MnDOT is evaluating potential improvements on Highway 316 between the north junction of Highway 61 and just south of Tuttle Drive to help with safety and traffic flow for drivers, pedestrians, and bicyclists. Here's how the community has prioritized area needs.

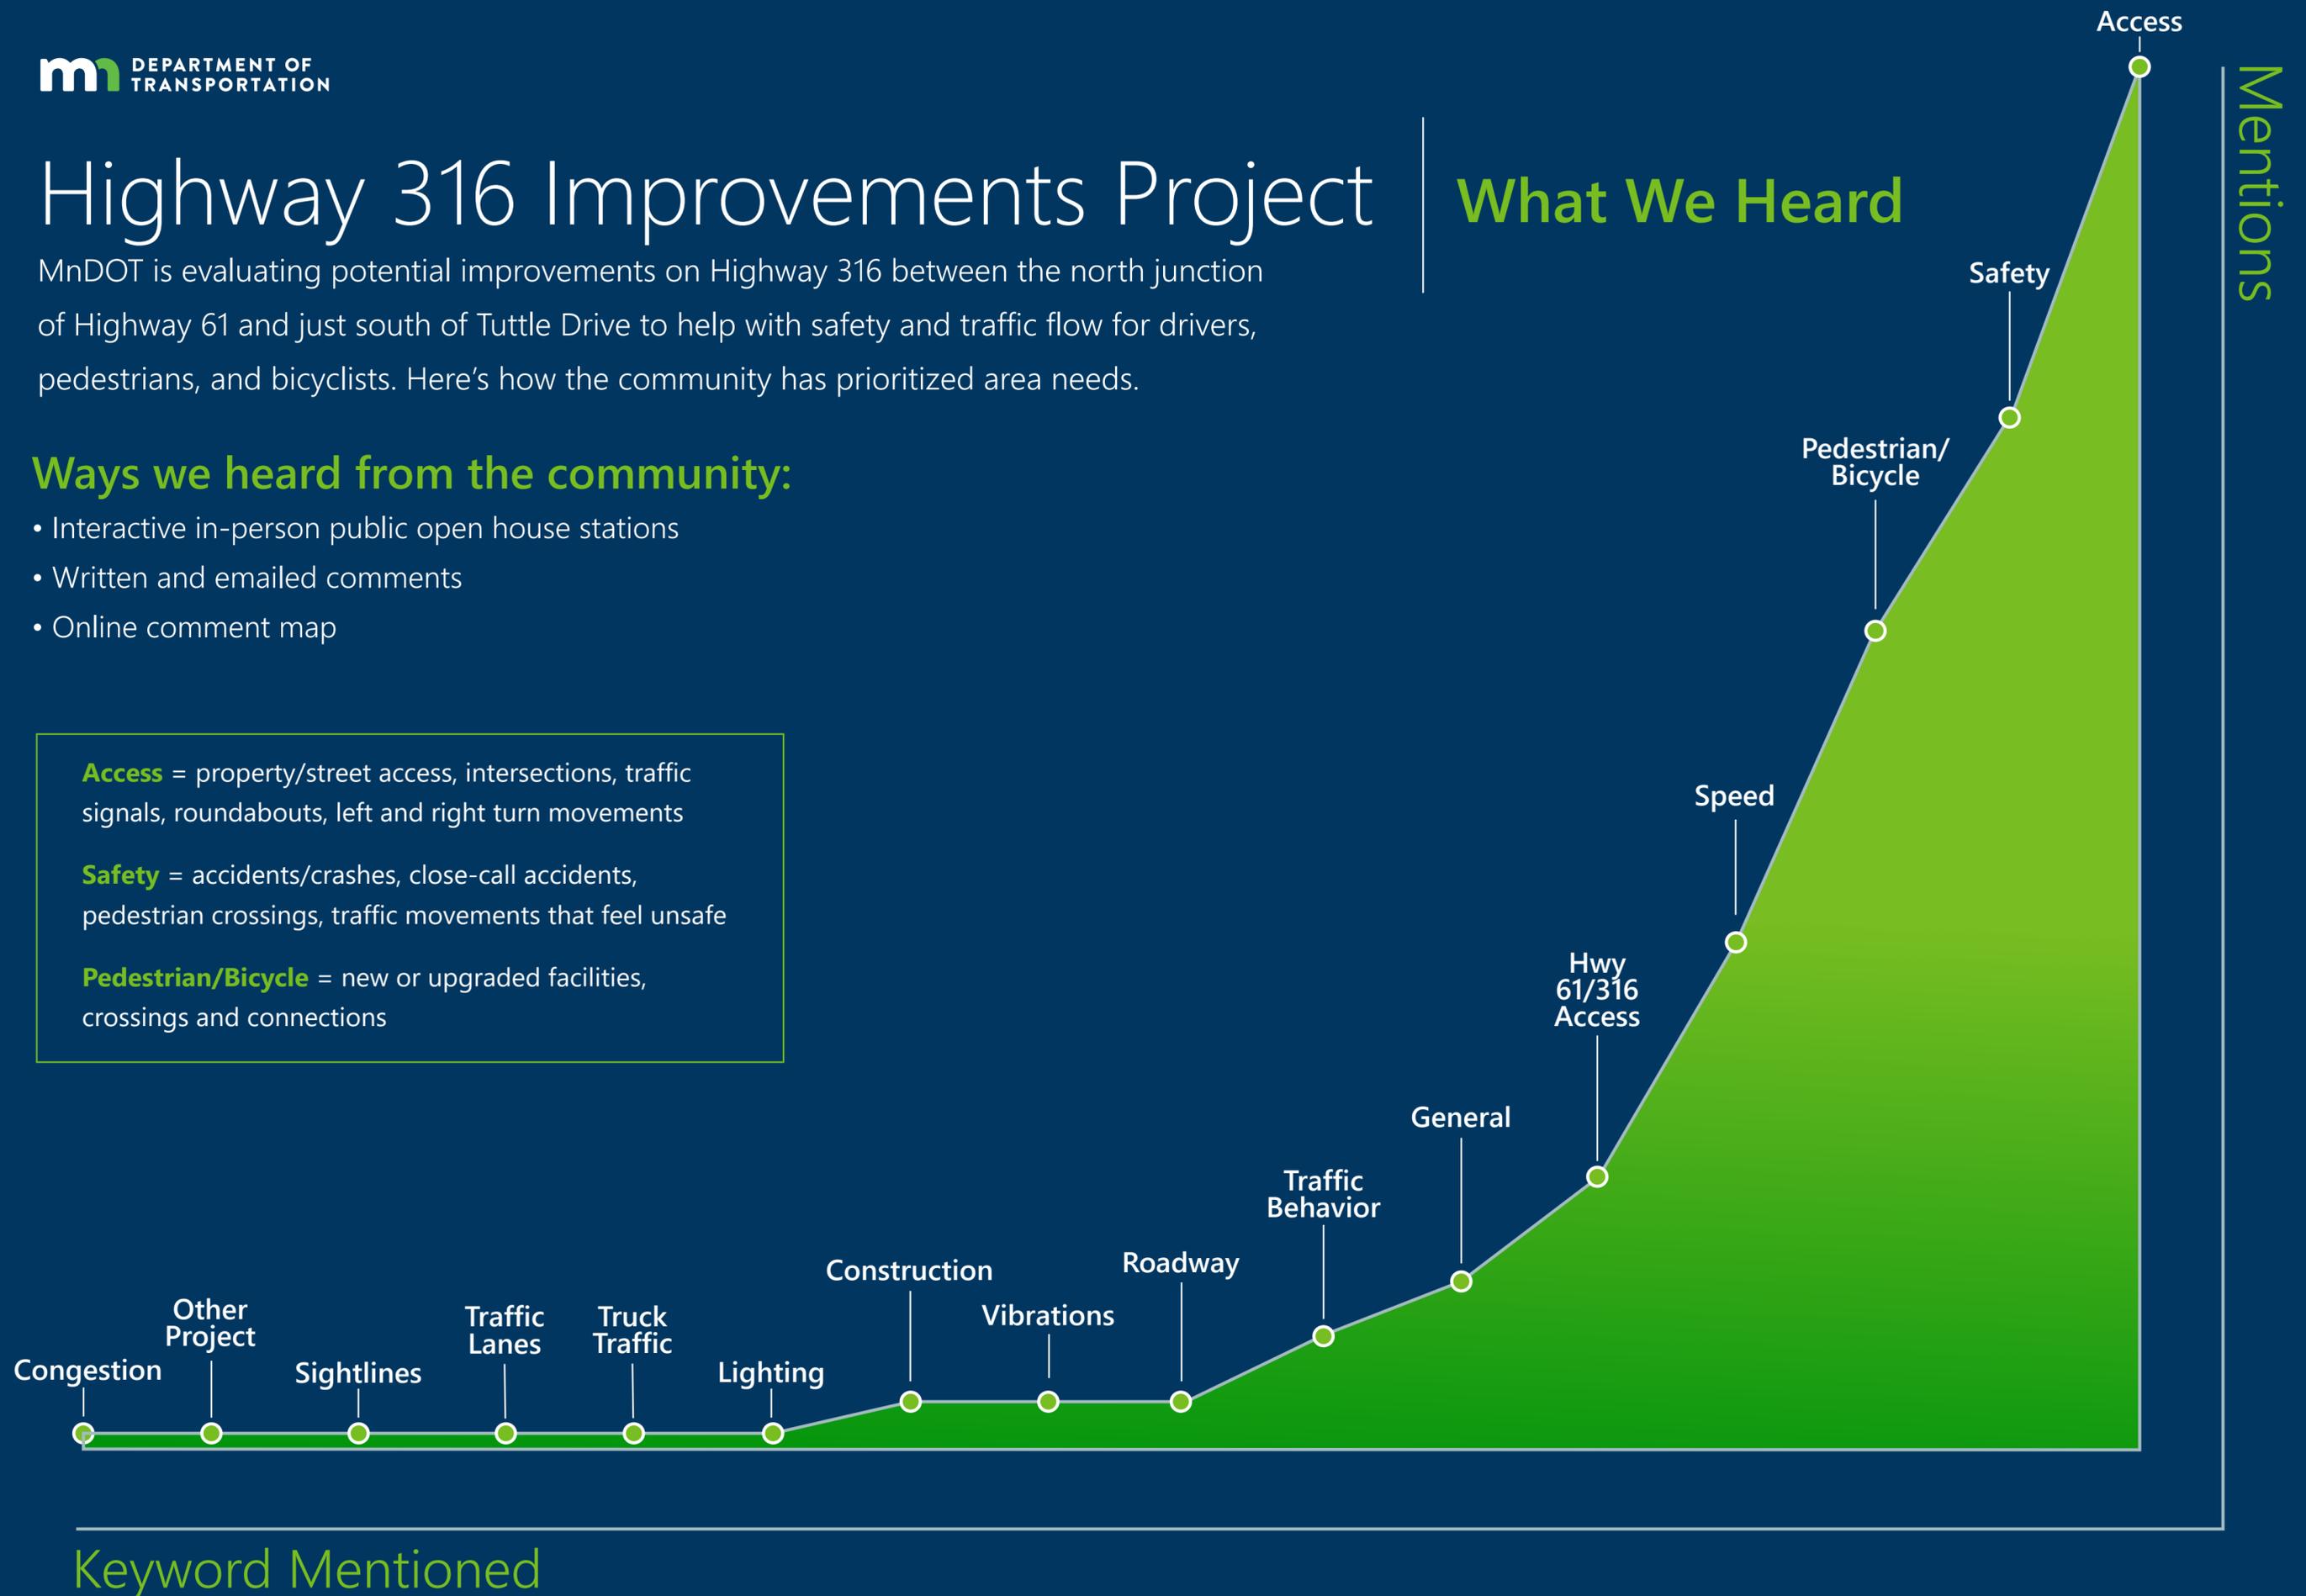

Ways we heard from the community:

- Interactive in-person public open house stations
- Written and emailed comments
- Online comment map

Access = property/street access, intersections, traffic signals, roundabouts, left and right turn movements

Safety = accidents/crashes, close-call accidents, pedestrian crossings, traffic movements that feel unsafe

Pedestrian/Bicycle = new or upgraded facilities, crossings and connections
