Business Community Engagement

Business Community Engagement

Document Business Needs  
Create Business Contact Data base  
Create concept project plan details, initiate special provisions, estimate items

Detail engineering plans, special provisions and related bid items to address business needs including adjustments as the business community is engaged.

Embrace engagement to the business community & provide resources to support the engagement. Proactively outreach to the business community and respond to their needs during construction. Celebrate with the community the success of the project. Provide an opportunity to have feedback from the business community.
