2013 Pier Foundations Work

20,947 cubic yards of concrete poured. That fills about 2,095 concrete trucks.

Caissons (40 total):

9 ft. diameter

120 ft. long

Required load capacity per caisson: 10,000 tons

More than 8 million pounds of rebar installed.

35 million gallons of water cleaned and recycled back to the St. Croix, enough to fill 53 Olympic swimming pools.

St.Croix CROSSING
