conference code: 1658926687

## **Presentation Overview**

At any one time, MnDOT staff are involved in more than 100 research projects to advance new ideas in the field of transportation and answer problems facing transportation practitioners. MnDOT Research Services Director Linda Taylor will highlight some of the research and pilot projects involving the traffic division. She will also provide tips for how you can get involved and get assistance for work needed in your area.

**Presenter:**

**Linda Taylor**

Linda Taylor, MnDOT Research Services & Library Director since 2009, has worked in many areas of MnDOT during her 34-year career: traffic, freeway operations, bridge and maintenance. She brings those experiences to play as she leads the agency's efforts in transportation research and implementation of new practices. Outside of work, Linda is a consummate baker, active long-distance biker and host for rescue dogs.
